

ANNOTATED

Brand guidelines

Production kit / Version 1.0 / 4 August 2026

The a-dot mark

The mark combines a geometric lowercase a with a full terracotta stop. The period is not punctuation added in type: it is an inseparable part of the symbol.

Construction

Letterform	Avenir Next Heavy outline, converted to path
Period	Circular form; diameter defines clear-space unit x
Master	1000 x 1000 viewBox; no linked fonts or images

Colour palette

Charcoal

HEX #212121

RGB 33 / 33 / 33

Primary ink, dark fields

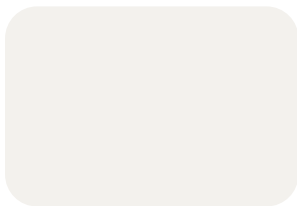

Terracotta

HEX #C15A45

RGB 193 / 90 / 69

Period and signature accent

Light grey

HEX #F3F1ED

RGB 243 / 241 / 237

Primary light surface

Accessibility note

Use charcoal on the light-grey surface for text. Terracotta is a brand accent and should not be used for small body copy without a contrast check.

Logo variants

PRIMARY / LIGHT

INVERSE / DARK

Use the primary mark on light or transparent surfaces. Use the inverse mark on charcoal or sufficiently dark photography.

Do not

- recolour the period
- separate or reposition the period
- stretch, skew or rotate the mark
- add outlines, gradients or heavy shadows
- place it on a low-contrast background

Clear space and minimum size

Keep at least one period diameter (x) clear on every side of the master canvas. This protects the full stop and prevents the mark from reading as ordinary type.

Minimum sizes

Standard mark	24 px digital / 8 mm print
Small icon artwork	16 px only from supplied icon exports
Chrome store icon	128 px canvas; 96 px artwork area

Typography

Avenir Next Heavy

Brand geometry and short display moments

The logo outline is based on Avenir Next Heavy, but the SVG master contains paths and does not require the font. If Avenir Next is used elsewhere, confirm the appropriate desktop or web licence.

Inter

Recommended UI, web and documentation family

Use Inter Regular for body copy and Inter SemiBold for controls and labels. Practical fallback stack: Inter, Avenir Next, Helvetica Neue, Arial, sans-serif.

Voice

Short, observant and concrete. Prefer sentence case. Let the period in the mark carry the visual emphasis rather than adding decorative punctuation or all-caps copy.

Digital applications

Chrome extension

Use the supplied PNG set in chrome-extension/icons. The 128 px store icon uses a 96 px artwork tile centered with 16 px transparent padding per side.

Chrome Web Store

Text-free, full-bleed promotional art is supplied at 440 x 280 and 1400 x 560. The art is designed to remain legible at half size and uses a dark field rather than a large light-grey area.

GitHub and social

The GitHub preview is 1280 x 640 and uses a solid background for predictable rendering. The social avatar is 1024 x 1024 and keeps the mark centered within a rounded tile.
